Field workforce verification and operations intelligence – on any phone, across every site, in 40 minutes

About Fastagger – Field Workforce Verification and Intelligence Platform:

Fastagger is a Microsoft ISV-certified enterprise platform purpose-built for organisations with distributed field workforces across Africa. Workforce Check-in is live on Azure Marketplace, MACC-eligible, and deploys in 40 minutes. Primary customers: COOs, VP Operations, and Estate Directors at security companies, agribusinesses, logistics firms, and construction groups managing 200–20,000 field employees. Microsoft Africa AI Accelerator alumni. GSMA AI for Africa Spotlight 5. Nvidia Africa AI Accelerator. Microsoft News EMEA, February 2026.,

What we offer

Fastagger Workforce Check-in is a configurable SMS data collection cascade that gives field enterprises direct, unmediated operational intelligence – bypassing the supervisor-mediated systems that make ghost workers invisible and operational planning impossible.

Enterprises configure a vocabulary of SMS keywords specific to their operations: patrol checkpoint codes, section and productivity inputs, route stop confirmations, zone and task codes. Workers send keywords throughout their workday on any handset – no app, no smartphone, no data plan. Each keyword generates a timestamped, location-tagged data event. Operations and HR see real-time, site-by-site intelligence on a cloud dashboard. Azure AI flags anomalies in the first week.

Built exclusively on Microsoft Azure and sold through Azure Marketplace. MACC-eligible – enterprise customers draw from existing Azure Consumption Commitments with no new budget approval.

Picture this

It is Monday morning. Your largest client has emailed: they are conducting a compliance audit and need time stamped proof of worker presence – and patrol route completion – across all your sites for the past 30 days. You have 48 hours. Without Fastagger: your area managers spend two days collecting paper registers that no auditor can verify. You submit what you have. The client is not satisfied. With Fastagger: you open the dashboard, select the client's sites, and export a timestamped, checkpoint-level compliance report. Four minutes. Every guard's check-in, every patrol checkpoint confirmed, every incident logged – direct from the worker's phone to your dashboard with no supervisor between the worker and the truth. The same dashboard shows three sites with systematic night-shift understaffing your supervisors never reported. You correct it before the client notices.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve. Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is the infrastructure backbone of Fastagger Workforce Check-in. Azure App Service hosts the live operations dashboard. Azure AI Services power ghost worker anomaly detection and deployment pattern analysis. Azure Functions process SMS check-in events in real time. Azure Active Directory provides role-based access for enterprise users via existing Microsoft credentials. Fastagger is Microsoft ISV certified and live on Azure Marketplace – MACC-eligible for enterprise customers. Every enterprise with an existing Azure Consumption Commitment can deploy Fastagger against committed spend, with no new budget approval and no IT security review delay.
